

Site Set up Activity

The aim of this activity is for you to set up a building site to accommodate 20 new houses using the below site plan. The red lines on the plan are the site boundaries, with a through road separating the two areas.

We would like you to plan and draw where you would build each of the 20 houses (Don't forget the gardens and drive's). Woodhead's sites also like to see new trees planted and plenty of green space. You could even include a children's play area.

You will also need to decide and draw on the site plan where your site compound will be. Your site compound must include all of items listed below. Woodhead's provide all of the below items on our sites, to ensure construction workers have a safe, clean area to work.

SITE COMPOUND ITEMS			
1. Site Cabin/office		2. Canteen	
3. Toilets (male/female/disabled/gender neutral)		4. Shower	
5. First Aid box		6. Fire Extinguishers	
7. Smoking Shelter		8. Vaping shelter	
9. Material Storage Area		10. Skip Area	
11. Parking		12. Safe Walking Area	
13. Health & Safety Signage		14. Fire Assembly Points	

You can either print off the below plan or draw your own. Be as creative as you like. We can't wait to see your designs!
